

The background is a dark, artistic composition featuring various watch components. In the lower-left, a large, detailed watch movement is visible, showing gears and a rotor with a diamond-patterned texture. To its right, several smaller gears and mechanical parts are scattered. The background also includes faint technical drawings and sketches of watch parts, with some labeled with numbers like '1021' and '1029'. The overall aesthetic is technical and precise.

ABOUT US

There is a kind of knowledge that enables you to do more than just master life. To gain it, you need a master who teaches you over years and decades. Sometimes over generations, even centuries. On this path, you fail again and again and get up believing that you are finally a master. But there is always something new to discover.

KIENZLE, as the oldest watch brand in the German-speaking region, stands for everything that requires mastery. Tradition that delivers values to this day. Exceptional quality, technology, design, the best choice of materials, and convincing reliability make KIENZLE models live forever.

With dedicated product experts who all value and carry forward KIENZLE's brand values, we will now expand the brand's history beyond watches to new product segments and give our customers the opportunity to afford KIENZLE brand products.

COMPANY HISTORY

1822

KIENZLE Uhren was founded in Schwenningen/Neckar as a German watch factory by master watchmaker Johannes Schlenker.

1894

Introduction of innovative production methods such as the use of prefabricated parts to reduce costs.

1897

Jakob Kienzle became the sole owner and the company was renamed “KIENZLE”.

1899 - 1903

The company begins industrial production with a workforce of 400 employees.

The production of watches and movements exceeds the million mark for the first time.

Establishment of a branch in Paris.

1904 - 1911

The company brought the first time clock onto the market, followed by inexpensive pocket watches, travel alarm clocks and wristwatches for women, as well as the first on-board clocks for automobiles.

The export share is 75%.

Establishment of a branch in New York / USA.

1922 - 1924

Transformation of the KG into a stock corporation.

Shareholders are family members. The total annual production is more than 3 million pieces.

COMPANY HISTORY

1956

Series production of automatic wristwatches begins.

The “Volksautomatik” was born to help self-winding wristwatches achieve their final breakthrough in Germany.

1960 - 70er

Every fourth wristwatch sold in the Federal Republic is a KIENZLE. Market leader in Germany.

Pioneer in the development of solar watches, battery operated watches and quartz movements.

Establishment of the Swiss branch “KIENZLE Zürich AG”. KIENZLE - Swiss models complement the wristwatch range in the area of more expensive watches.

1986/87

Introduction of a solar watch with low light requirements.

With over 300 million watches and timepieces sold all over the world, KIENZLE is becoming an international brand name in the watch industry.

1990

Waterproof diving watch up to 12,000 meters depth and the first radio controlled alarm clock with analogue alarm time setting.

Market launch of a faster radio controlled movement.

2010

Takeover of the KIENZLE watch brand and the operational business by the owner family.

A new KIENZLE watch collection comes onto the market and is being launched internationally.

2024

The new owner, Kienzle GmbH in Wels, takes over the Kienzle brand. With dedicated product experts who all vakze and carry forward KIENZLE’s brand values, we will now expand the brand’s history beyond watches to new product segments and give our customers the opportunity to afford KIENZLE brand products.

BRAND VALUES

“KIENZLE as a German brand stands for precision and innovation from tradition.”

Since 1822, we have combined the highest product quality with continuous innovation and these values will continue to represent the core of the KIENZLE brand in the future.

The background is a dark, artistic composition featuring various mechanical watch components. In the lower-left foreground, a large, circular watch movement is visible, showing intricate gears and a diamond-plate pattern on its base. Scattered around it are other parts, including gears, a small metal plate, and a larger, curved component. Faint technical drawings and sketches are visible in the background, adding to the industrial and precision theme of the image.
